

R E S I D E N T I A L P R O J E C T S

Over the past ten years we have been responsible for the design and/or delivery of a number of 'one off' private residential projects, more recently as Pennine Sustainability and previously with Cottrell and Vermeulen Architecture and Tisdall Brougham Architects. Whether new build or refurbishment; conservation area or busy high street; each project presents a set of unique challenges and requires a corresponding skill set. Our expertise in dealing with statutory and planning obligations and our ability to advise on environmental sustainability adds value to each project. In each case we work closely with our client to understand their needs and we work creatively with what we find on the site to provide a design that is responsive, economical and delightful.

Ashfields

Computer Rendered Sectional Perspective (above);
Computer Rendered Perspective of the main living area (above right).

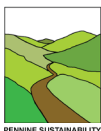

The design intention for Ashfields was to transform what appears from the street to be an unremarkable bungalow. The house sits on a steep slope and has a two storey south facing rear elevation with panoramic views, but these opportunities are currently under exploited.

A new staircase would form a double height slot, with an open plan kitchen diner alongside to maximise light and views. The remaining spaces in the house have been planned to maximize bedroom space. New timber and aluminium windows and a rendered exterior would complete the transformation into a simple modern house.

Key Details

Architect: Tisdall Brougham Architects

Design Completed: 2007
